

REMARKS

Applicants provisionally elect the species SEQ ID NO: 4 with traverse.

Applicants have elected Group 4, claims 10-11, 13-14 and 42-44, drawn to BV16 TCR without traverse. Group 4 claims encompass just 4 peptides derived from BV16 TCR, namely SEQ ID NOS: 4-5, SQD and SLL. Applicants submit that it would not be an undue burden on the Examiner to search these four peptides as they are all derived from the same receptor, BV16 TCR. A search for the BV16 TCR will encompass all the four peptides. Accordingly Applicants respectfully request that all the four sequences be included in the examination of Group 4 claims.

This is intended to be a complete response to the Restriction Requirement mailed March 09, 2006. If any issues remain outstanding, the Examiner is respectfully requested to telephone the undersigned attorney of record for immediate resolution. Should any fees be due, please debit Deposit Account No. 07-1185 upon which the undersigned attorney is allowed to draw.

Respectfully submitted,

Date: April 10, 2006
